Memo to File:

RE: ACT/053/002

On February 13, 1978 Brian talked with John Blake of the Division of State Lands. John said that the Wilford Hansen Stone Quarries application for lease ML-35528 was still pending board approval. This is due to known plans which in the future might cause a water storage reservoir to be built in the Warner Valley. If this happens the operator of a mine on the lease would have to abandon the operation. The lease will not be let without appropriate language included which would provide for the above contingency.
